

## ABSTRACT

---

8 Senior High School Bandung is one of the best National High School in Bandung, it located at Jl.Solontongan No.3-Bandung, west Java. Like the other high schools in indonesia it has three years of studies, ranging from class X to class XII.

Special services officer at 8 Senior High School Bandung in doing work report recording, report cleaning, consumables commodity reports, and made an equipment applications that is still use manual recording and reporting by using a media such as paper. Therefore arose the problem of loss and damage to the document, inaccurate data due to imptoper data recording, data duplication, and consistency of data. Therefore, the authors propose to make Application in Web Based For Monitoring The Special Service Officers and Management of Consumables Commodity to helps special service officers in making required reports.
