

Abstract

The Progress of time hardly could no longer to be avoided in human life. One of them is technology, so much the impact of it has evolved rapidly around of our life. One of them is the lack of specialization of history where indirectly build themselves, their environment, and also their nation. Therefore we need a method to make it not happend continually, so in the future our nation's history isn't just a history with intoroduce to user about historical and culture about our nation through the something exciting about the game.

FPS (First Person Shooter) Game is the popular games now and getting enough place among the gamers. And this game was made to introduce the user about the culture and history of particular event. 3D is a graphic teknologi that describes and object in 3 axis, x, y, z. With using 3D graphic in the game, the user are expected to get another sensation of a more natural and appealing. In this project we made, history of the event is Bandung Lautan Api from West Java

Keywords: FPS, Bandung LautanApi , West Java
