

## ABSTRACT

---

*The main task of a lecturer who called College tridharma measured based on the load performance of a lecturer (BKD) covering the areas of education and teaching, research, outreach, and support. University of Telkom enforce judgments based on the decision to be the BKD, Rector of the University of Telkom KR Number 108/SDM03/WR. 2.0.0/2014 about Institutional performance systems University of Telkom and effectively enforced starting Odd Semester academic year 2014 2015. Contract assignment BKD done in a tiered, beginning with the filing by each lecturer BKD contract in accordance with the form provided and will be evaluated by the Chairman of the study Program (Kaprodi). After conducting further evaluation, Kaprodi contract BKD will passed by the Dean. Each Professor is required to make the contract BKD beginning of each semester and its achievement will be measured at the end of the semester, and as a contract evaluator kaprodi BKD is not directly involved in providing the assessment of the achievement of the contract under which professors BKD. Most major difficulty experienced by Kaprodi is the lack of tools for monitoring the achievement of the contract so that the lecturer, BKD kaprodi has no ability to provide coaching to the lecturer who can not meet contract BKD. The head of study program should have ability to monitor the achievement of lecturers' performance load contract of each lecturer so that, the result which is obtained by lecturers' contract will be appropriate with the contract. This final project using the method of the working Prototype using the programming language PHP framework CodeIgniter and MySQL database.*
