

ABSTRACT

Learning application of Sundanese script using Flash for 10th student in 22 Senior High School Bandung is an application which can be used as a tool to convey the materials of the Sundanese script to the students in the teaching learning activity. Today, the teachers still use text books as an effective tools to convey the materials to the students in the process of teaching and learning activity. In this way, there are still many problems in conveying the illustration that may makes them easy for the students to understand. The combination of the materials with multimedia features can be created as a tool which is able to explain this well. Hopefully, this application can be used to convey illustration better and become an alternative learning guide. The application of learning Sundanese script contain the learning materials, exercise and explanation based on Sundanese script book KTSP Pengajaran Bahasa Sunda 2006. Creating this application using model ADDIE which contains several steps: analyze, design, implementation and evaluation.

Keywords: Sundanese Script, Multimedia, ADDIE
