

ABSTRACT

Bandung is a city with high level of education especially if it come with creativity and inovation. With the improvement in knowledge of technology, art, design and culture, it is required to have an improvement of the facility that support the development of that knowledge itself especially for college because college student have the biggest impact for the future of the science and the society. So, the improvement of the technology can be followed up with the improvement of social and economy and also the level of education in Bandung especially in the Maranatha Christiani University's environment. The improvement of Integrated Library of Christiani University Maranatha is based of the lack of utilization within the interior and furniture inside the facility. In the improvement of the facility, there is a requirement of data that include the needs of the University and the user of the library and standardization of the library especially the aspect of design interior. All of those data will be used as a basic data for the process of the redesign. With the standardization of the library, there is many thing that can be improved including the interior and other relevant aspect. Therefore, the improvement of this library is needed to maximizing the function. Besides, the style of Maranatha Christian University is so minor, and it is important to adapting the style of Maranatha Christian University to the facility of the library so that the Integrated Library of Maranatha Christian University will have it own atmosphere accentuated.
