
ABSTRACT

The globalization in the world influence the increasing of transportation people and things to every country, so the boundaries of state can be unlimited for every human actions. Human could go to everywhere and every time all around in the world. This is occurred in Indonesia also. The Transportation is not only in local but also abroad. For that reason, Passport (SPRI) needed.

The importance of SPRI makes the process in attention so its not take a long time to made. The process consist of sub process in all connected units. For that reason, the information and data that transport to all connected units should flow in good conditions. So, the information system needs by the Immigration office to integrate all data that use to make a passport

Keys Word: Flow process, information system
