| Gambar IV. 12 Gambar Rancangan Konfigurasi Komunikasi <i>Wireless</i> .....            | 58 |
| Gambar IV. 13 Gambar <i>Show all connections</i> .....                                 | 58 |
| Gambar IV. 14 Gambar <i>Properties Local Area Connection</i> .....                     | 58 |
| Gambar IV. 18 Gambar <i>Internet Protocol (TCP/IP)</i> .....                           | 59 |
| Gambar IV. 19 Gambar <i>Internet Protocol (TCP/IP) Properties</i> .....                | 59 |
| Gambar IV. 20 Gambar <i>File New CX-Programmer</i> .....                               | 59 |
| Gambar IV. 21 Gambar Pemilihan Jenis PLC .....                                         | 60 |
| Gambar IV. 22 Gambar Pemilihan tipe CPU PLC .....                                      | 60 |
| Gambar IV. 23 Gambar Memasukkan <i>IP Address PLC</i> .....                            | 61 |
| Gambar IV. 24 Gambar <i>Online Program</i> .....                                       | 61 |
| Gambar IV. 25 Gambar penulisan <i>item name</i> .....                                  | 61 |
| Gambar IV. 26 Gambar <i>Settingan Access name</i> .....                                | 62 |
| Gambar IV. 27 Gambar <i>System Management Console</i> .....                            | 62 |
| Gambar IV. 28 Gambar <i>Settingan Global Parameters</i> .....                          | 62 |
| Gambar IV. 29 Gambar <i>Add Adapter Object</i> .....                                   | 63 |
| Gambar IV. 30 Gambar <i>Settingan IP Address System Management Console</i> .....       | 63 |
| Gambar IV. 31 Gambar Pemilihan Tipe PLC Pada <i>System Management Console</i><br>..... | 64 |
| Gambar IV. 32 Gambar <i>Settingan Device group</i> .....                               | 64 |
| Gambar IV. 33 Gambar <i>Simulator Plant Proses Mixing and Cooking</i> .....            | 65 |
| Gambar IV. 34 Gambar <i>Simulator Plant Proses Bottling</i> .....                      | 66 |
| Gambar IV. 35 Gambar <i>Simulator Plant Proses Packaging</i> .....                     | 67 |
| Gambar IV. 36 Program <i>Wireshark</i> .....                                           | 68 |
| Gambar IV. 37 Gambar <i>menu capture</i> .....                                         | 68 |
| Gambar IV. 38 Gambar memilih <i>wireless network connection</i> .....                  | 68 |
| Gambar IV. 39 Gambar <i>menu options</i> .....                                         | 69 |
| Gambar IV. 40 Gambar <i>stop capture automatically after</i> .....                     | 69 |
| Gambar V. 1 Gambar Skenario Rancangan Sistem .....                                     | 71 |
| Gambar V. 2 Gambar <i>Start Proses Cooking dan Mixing</i> .....                        | 72 |
| Gambar V. 3 Gambar Program <i>input</i> kebutuhan liter air .....                      | 73 |
| Gambar V. 4 Gambar Program <i>input</i> kebutuhan liter gula .....                     | 74 |
| Gambar V. 5 Gambar Program <i>input</i> kebutuhan liter mcc .....                      | 74 |

|                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------|-----|
| Gambar V. 6 Gambar Program <i>input</i> kebutuhan liter susu .....                                                       | 75  |
| Gambar V. 7 Gambar Program <i>input</i> kebutuhan liter coklat .....                                                     | 76  |
| Gambar V. 8 Gambar program <i>input</i> kebutuhan liter Strawberry .....                                                 | 76  |
| Gambar V. 9 Gambar Program <i>Set Up Timing Cooking</i> .....                                                            | 77  |
| Gambar V. 10 Gambar Program <i>Set Up Timing Cooking</i> .....                                                           | 77  |
| Gambar V. 11 Gambar Program pengaktifan <i>timer cooking</i> .....                                                       | 78  |
| Gambar V. 12 Gambar Program pengaktifan <i>timer mixing</i> .....                                                        | 78  |
| Gambar V. 13 Gambar Program <i>emergency stop</i> .....                                                                  | 79  |
| Gambar V. 14 Gambar Program Proses <i>Bottling Plant</i> .....                                                           | 79  |
| Gambar V. 15 Gambar Pemilihan Mode Proses <i>Packaging</i> .....                                                         | 80  |
| Gambar V. 16 Gambar Program Mode Manual Proses <i>Packaging</i> .....                                                    | 81  |
| Gambar V. 17 Gambar Program Mode Otomatis Proses <i>Packaging</i> .....                                                  | 81  |
| Gambar V. 18 Gambar Proses Pengaktifan Konveyor dan penghitungan Botol ..                                                | 81  |
| Gambar V. 19 Gambar Program Pengaktifan <i>Timer 1</i> .....                                                             | 82  |
| Gambar V. 20 Gambar Program Pengaktifan Silinder Turun.....                                                              | 82  |
| Gambar V. 21 Gambar Program Pengaktifan Vakum dan <i>Reset Silinder Turun</i> .                                          | 83  |
| Gambar V. 22 Gambar Program Pemindahan Botol .....                                                                       | 83  |
| Gambar V. 23 Gambar Program <i>Reset Silinder Turun</i> .....                                                            | 84  |
| Gambar V. 24 Gambar Program Mengembalikan Silinder ke Konveyor 1, <i>Reset barrier</i> , dan mengaktifkan konveyor ..... | 84  |
| Gambar V. 25 Gambar Program Waktu Jeda <i>Reset</i> .....                                                                | 85  |
| Gambar V. 26 Gambar Program <i>Reset Sistem</i> .....                                                                    | 85  |
| Gambar V. 27 Gambar Program <i>Emergency stop</i> .....                                                                  | 86  |
| Gambar V. 28 Gambar Alokasi <i>Input dan Output</i> .....                                                                | 86  |
| Gambar V. 29 Gambar skema <i>closed loop process</i> .....                                                               | 98  |
| Gambar V. 30 Gambar skema <i>open loop process</i> .....                                                                 | 99  |
| Gambar V. 31 Gambar Klasifikasi <i>quality of service</i> pada <i>wireless automation</i> menurut ISA .....              | 100 |
| Gambar V. 32 Gambar pengukuran <i>delay</i> jarak 5m .....                                                               | 100 |
| Gambar V. 33 Gambar pengukuran <i>delay</i> jarak 10m .....                                                              | 101 |
| Gambar V. 34 Gambar pengukuran <i>delay</i> jarak 15m .....                                                              | 101 |
| Gambar V. 35 Gambar pengukuran <i>delay</i> jarak 20m .....                                                              | 101 |

|                                                            |     |
