

ABSTRACT

Absence of IT governance in e-learning system at IT Telkom give impact to unclearly job assessment between unit related to e-learning, unclearly e-learning priority status, also irrelevant ways between e-learning and business goals. Due to that conditions, it need a processes that can monitor and evaluate the whole system. COBIT 4.1 becomes the framework that support monitoring and evaluation process that focused in ME (Monitor and evaluate) domain. ME domain focus to analyze IT performance, internal control, and IT governance. The expected result from this monitoring and evaluating system of this e-learning is an enhancement recommendation of arrangement system of existing condition.
