

## DAFTAR GAMBAR

|  |    |
|--|----|
| Gambar 2.1 Willem Einthoven                              | 5  |
| Gambar 2.2 Penampang Jantung                             | 6  |
| Gambar 2.3 Sinyal EKG Normal                             | 7  |
| Gambar 2.4 Sadapan I, II dan III                         | 8  |
| Gambar 2.5 Sadapan Ekstremitas                           | 8  |
| Gambar 2.6 <i>Precordial Lead</i>                        | 9  |
| Gambar 2.7 PS400 Kontrol dan Indikator                   | 10 |
| Gambar 2.8 sinyal SQU 2 Hz                               | 12 |
| Gambar 2.9 Sinyal sine                                   | 12 |
| Gambar 2.10 Sinyal BPM                                   | 13 |
| Gambar 2.11 Multiplexer                                  | 13 |
| Gambar 2.12 Blok Diagram Atmega 16                       | 15 |
| Gambar 2.13 Pin Atmega 16                                | 15 |
| Gambar 2.14 Kecepatan sampling ADC                       | 16 |
| Gambar 2.15 Pin RS232 (DB9)                              | 18 |
| Gambar 2.16 Konektor USB (tipe A dan tipe B)             | 19 |
| Gambar 2.17 Serial (RS232) ke USB Converter              | 19 |
| Gambar 2.18 <i>Wireless Access Point Product</i> Linksys | 22 |
| Gambar 3.1 Blok Diagram Sistem Umum EKG                  | 23 |
| Gambar 3.2 Blok Diagram Rangkaian Digital EKG            | 24 |
| Gambar 3.3 Rangkaian Pemilihan Lead                      | 25 |
| Gambar 3.4 Rangkaian Pengkondisi Sinyal EKG              | 27 |
| Gambar 3.5 Rangkaian Filter LPF Orde 3                   | 27 |
| Gambar 3.6 Rangkaian Filter HPF                          | 27 |
| Gambar 3.7 Rangkaian Adder                               | 27 |
| Gambar 3.8 Rangkaian Penguat Inverting                   | 28 |
| Gambar 3.9 Sistem minimum ATmega 16                      | 28 |
| Gambar 3.10 Sistem Diagram Serial Komunikasi             | 29 |
| Gambar 3.11 Rangkaian Max232 Serial Komunikasi           | 29 |
