ABSTRACT

Training is one of process which is purposing to help achieve the organizational goals. PT Primarindo Asia Infrastructure,Tbk is a company specialized in shoes industry, especially sports shoes and produce in a variety of functions and sizes.

PT Primarindo Asia Infrastructure Tbk is facing some issues in training process. Training documentation which was created manually cause the data could not be provided in real time and level of accuracy also velocity of data search is slow. Based on discovered problem, it need to apply of Microsoft Dynamics AX 2012. This modules will used which is training modules.

Implementation training modules of Microsoft Dynamics AX 2012 is very useful for training documents later that have been implemented, can be available in real time and employees who have attended a particular training could be found easily from employee integration data.
