

ABSTRACT

The talent of primary school aged children or ages 5-12 years is starting to show and this is a good time to start developing their talents especially in the field of arts. Parents are still not sensitive about the talents that their kids have because they are occupied by other activities. Art in school lessons is still the second subject and many courses such as sanggar still lack in security and convenience of on-site facility for children. Art lessons are very beneficial for the development of motor, cognitive, physical, emotional, and social skills for ages 5-12 years. This art lesson can be used as a container for self-expression, gives self-confidence, develop imagination and creativity of every child.

Child Creativity Development design is a non-formal institution that facilitates specifically for children aged 5-12 years, whose aim is to find or develop talent and help in the development of children's growth. This design takes special notice in several interior aspects that are very important for children such as freedom, safety, and comfort. Freedom in doing activities for children requires plenty of space because of the tendency of active kids. Safety in the use of furniture material or finishing and against unexpected hazards. As well as the comfort of children so that they can easily adapt to the new environment. In this design, it can be concluded that the art is very beneficial for child development especially in children aged 5-12 years. And a place that is free, secure, and comfortable is crucial in facilitating an interior space for children.
