ABSTRACT

Al-Mukhlisin institution is one of Moslem institution located in Bandung District, has been operating since 1970. New student admission in this institution is still using a manual method, so it has not been well managed, as the lack of discipline of the students in term of registration requirements, the information of Al-Qur'an reading an writing test wasn't well informed to all of the students candidates, also the lack of students awareness in payment, PSB announcement did not reach the students parents who's reside outside Bandung District, and PSB report did not reach the institution principal. With the problems that occur in the institution, then made a Web Based Application Of New Student Admissions Supported SMS Gateway, with the purpose of facilitating students and the school in managing PSB. The method used inthis work is waterfall method, in the requirements stage an interview, observation and quisonary conducted. The tools used was PHP and MySQL. The used was Black Box Testing and User Acceptence Testing. The result acquired is an A Web Based Application of New Student Admission Supported SMS Gateway.
