ABSTRACT

Practicum is one method of learning, in addition to learning about the theory. Practicum is the implementation of what has been learned from the theory. In practical activities in three diploma courses especially in Information Management study program incorporated in activity theory. The absence of the courses held only make the calculation and recording lab practicum becomes difficult. Practicum can be carried out in the Laboratory together with lecturers and assistants. The process of recording practicum is still done manually and not integrated with System i-gracias. Therefore, the application needs to be made to record the entire practicum in D3 Information Management. This application can also generate output that report. The report generated from the application will be able to support the collection of evidence for accreditation activities. In a standard diploma accreditation includes standards of commitment to the effectiveness of educational programs. In the current study, the standards which became the only research on the standard 5 ie curriculum, learning and academic atmosphere. This application uses XAMPP (Apache, PHP, MySQL) as a stand-alone server (localhost). This web-based application will help the head of the study program to monitor practicum and to produce a report on the lab running.
