

ABSTRACT

In 2013, the government changed the curriculum of KTSP 2006 to the 2013 curriculum. One of the subjects of language and cultural sciences set out in the Curriculum 2013 is Germany language. SMA 1 Kajen is one of the schools that make the Germany language into one of the foreign subjects for X class. Currently the German language learning facilities in SMA Negeri 1 Kajen is still conventional where teachers how to teach the material in front of the class assisted with the book package as a guide teach. Meanwhile, the students listen and record the material presented by the teacher. The schedule of meetings in teaching and learning process is only 1 week 2 meeting and just 2 hours lessons. With a limited schedule of meetings, so that the Germany language material is not in full convey causes the students do not completely understand.

Therefore to overcome the problem is proposed a Germany language learning application. In this application there are some features that can be used by the user of Das alphabet material, Begrüßung, Sich vorstellen, and Andere Personen vorstellen which the material in accordance with the manual in SMA Negeri 1 Kajen is Deutsch ist einfach. This application is created by using Analysis, Design, Development or Production, Implementation or Delivery and Evaluations (ADDIE) and Java programming language.

From the blackbox test results and questionnaires, the users provide a rating of 91.5% for ease in understanding of Germany alphabet material and sound. In additions users also provide a rating of 100% for easy to use application.

Keywords: Germany Language, material of Das alfabet, Begrüßung, Sich vorstellen, and Andere Personen vorstellen
