

## ABSTRACT

---

*Graha Mutiara Minimalis Company is a company engaged in the construction of housing construction located in the city of Bekasi. The company has been established for 10 years and has also run several housing projects with the number of homes that have been built as many as hundreds of units. In the process of payroll and attendance recording is still done manually as the payroll process is still calculated one by one to get the final salary, In the payroll confirmation process still use the document to be seen by the leader and for absentee still use paper that must be signed every day.*

*Therefore it will be built payroll application in Graha Mutiara Minimalis based web using PHP programming language, MySql database and using prototype method, this application will be used to assist in performing payroll process, attendance recording and confirmation. This app can help with payroll management such as calculating payroll, reporting and paycheck printing. As in the process of payroll management calculates payroll, report and print paycheck. For attendance management such as attendance records are already directly using applications, storage and recap attendance. With the build of this application is expected to help better again in the process of calculating the salary and manage the presence in the company Graha Mutiara Minimalis.*

*From the black box test results, the application is made to get a 95% assessment for the feature of attendance recording because the available features are running as it should. Being for the payroll feature gets a 90% rating because it feels helpful for payroll employees.*

*Keywords: payroll, recording, report, employee.*
