

ABSTRACT

Branch manager of Taekwondo Indonesia in Cimahi is an agency that provides structure and infrastructure for the Taekwondoin athletes to channeling the interest and talent and also to practice and can achieve in martial arts. The process of delivering information about Taekwondo in Cimahi is still from mouth to mouth and using social media. And also registration for final test is still manual, that was by filling out the registration form. Because of that problem the writer find idea to create "WEB-Based Application of Members Data Processing and Activities Information Taekwondo Indonesia in Cimahi". This application using prototype method. The database used MySQL. The users of the application is Taekwondo Indonesian branch manager of the level increace test section, coach and operator of branch manager. The application is expected to fix the problems in final test registration and to delivering information Taekwondo activities around Cimahi.

Keywords: information activities, final test registration.
