ABSTRACT

Extracurricular is a non-formal learning activities conducted school learners. Extracurricular activities intended for students to develop personality and talents in various fields beyond the academic. At SMAN 2 Cimahi there are 12 kinds of extracurricular supplied and the process of managing extracurricular has been going well, but in terms of registration, rate management and send of information to parents of students at SMAN 2 Cimahi is still less than optimal remember the registration process still have to queue, rate management extracurricular still use physical media, and send of information to parents is still less rapid notification. see the problem then came the idea to build the " Web Based Registration and extracurricular score management application in SMAN 2 Cimahi". The method used to build this application is the waterfall method. The language used is PHP. The database used is MySQL. App user are preceptor extracurricular and student, whereas an admin is part of the student section. The functionality in this application is the user admin can manage student data, manage the data value, sending the message information to the parents. Users extracurricular builder can enter data values, student attendance data and send the assessment report to the student section. Student users can input data themselves. This application can handle problems in the registration process, assessment and information sharing activities to parents.

Keywords: Registration, Assessment, Notification Information to Parents
