

ABSTRACT

Safety when doing motorcycle touring activities is the most important thing for motorcyclist. It is also important to know whether the touring equipment is appropriate or not before or after it is used. This is to prevent damage to touring equipment. In order for touring equipment not easily damaged, it must be stored in special storage areas such as cabinets to prevent touring equipment accumulate. If the touring equipment are accumulated it will make the touring equipment smelly and damaged. The design of this cabinets is done by doing questionnaires, interviews and literature study to obtain the relevant data. The results of this design is a cabinet that makes touring equipment not scattered and safe.

Keywords: Not scattered, Wardrobe
