

ABSTRACT

Boarding school is a school with a boarding system, where learners and also the teachers and school administrators stayed in dormitories in the school environment in certain period of time. Time goes by more and more foundations who founded the Boarding School so that his own Boarding school no longer strangers are heard, and the more time Boarding School itself became a school trend intended parents also students ,due to the offering system able to keep also foster students over the past 24 hours. In this final project design project that was taken is a us-based Islamic Boarding School campus namely two from As-Syifa residing in South tangerang. The authors restrict this Boarding School design project by simply taking a few buildings such as junior high school, senior high school, Laboraturium, IC center, and Boarding. Purpose of designing this final project is a project to address the problems that are present on the campus of one As-Syifa Subang, including ergonomics, Islamic atmoshpere, also the configuration with the surrounding environment.

In answering these problems then the theme to use "friendly Islamic School" with the concept "Tropical Design" are all reviewed from several aspects. Based on aspects of the site, aspect, aspect of Islamic Institutions. Application of the theme and the concept of them in terms of local materials that are easily obtainable,the utilization of vegetation location capable configuration with the interior, also in the Islamic atmoshpere from Islamic values itself

The results of the design with the theme and the concept is expected to answer theproblems that exist on the campus of one As-Syifa Islamic Boarding School corms then applied on designing As-Syifa Islamic Boarding School in Tangerang.
