

Abstract

Education is a pillar that plays an important role in the progress of a nation. In along with growing times. Human resources are expected to continue to change dynamically. Education must be able to provide quality output. But there are still many students in grade 5 elementary school in Yogya city less interested in Social Studies Lessons especially history, because in the history of 5th Grade Students are required to memorize, plus uninteresting textbook less interesting, there are many texts that make Students bored easily. The purpose of this design takes history, because with a history lesson can be to help 5th graders in understanding the identity of self, family, community and nation. Methods in this design using data collection method of observation, Questionnaire, interview, literature study and matrix analysis And it can be concluded the final design results in the form of web comics that can be used as an interesting educational media with internet-based that can be accessed easily and free via smartphone or computer. The benefits of designing web comic become the right educational media to increase students interest in history lessons and participate in implementing one of the three dharma collages, that is community service.
