

## **Abstract**

The baby is a gift or deposit that is so anticipated and expected by both parents, so that after the baby is born the supporting equipment and comfort of the baby in interacting in daily life should be considered by the parents are encouraged to invite the child or baby to know the environment either through travel or traveling and events Silaturami visits family or friends in different locations.

Traveling or traveling is comfortable and very influenced by the determination of the location of the tour, the condition of facilities and infrastructure at the tourist sites and supporting facilities provided both during the trip and during the location of the tour of the baby being carried by his parents

It requires facilities and infrastructure that meet the requirements of comfort, convenience and security to make the travel atmosphere more relaxed and safe. There are many ways in carrying and carrying your own equipment and baby equipment while traveling. When the activity is currently dominant traveling to carry equipment and equipment baby supplies when traveling parents are congenital luggage separated so difficult and often cause goods scattered or lost especially the needs of infants because of small.

Currently the author tries to design a product to simplify and help solve the above problems by combining or integrating or integrating between congenital baby supplies and parent goods
