

ABSTRACT

France Cultural Center (FCC) is the place that builds and develop France's culture. France is one of the advance country, that wants to show its progress to other countries in Indonesia. FCC is spread at several major cities in Indonesia including Bandung. The FCC in Bandung at the moment does not have the processing element of interior that shows the France image of developed countries like how they wanted to show to other countries because the building used is a heritage building. Therefore it needs new design for the interior of the FCC in Bandung and also it could create a modern and developed interior for the FCC, then it will be coupled with the characteristics of the Bandung citizen that is creative and simple because this FCC is located in Bandung, the design will be applied through interior element such as walls, floors, and ceiling according to the standard of the ergonomics, purpose, and activity there is at FCC in Bandung. The design of this FCC in Bandung is expected could reach the optimal result so that it could give positive impact for the users both in design or in function.
