

*Abstrac-Airport has function that provided as a departure place and the arrival of passenger. Airport also act as a gate to welcoming foreign passenger to its local area that contain or reflect its culture. Syamsuddin Noor Internasional Airport is a main airport that located in Banjarmasin City, South Borneo. The necessary for providing the comfortable when the passengers are in the departure station, things which is should be considered is the comfortable, technically consist of : circulation, thermal, lighting, sign system, and colour that applied into the visualisation that able to stimulate passengers comfort and Banjarmasin City representation.*

*From the result of the design can be concluded that the main goal is to transform that achieved from the processing of philosophic shape from the local architectur and material choice. And also to answer from the technical problem into visualitation shape that already planned into local theme*
