

ABSTRACT

Development in the industry is much needed. One of it is a tool for splitting bamboo manually, with this manual bamboo splitting tools, bamboo craftsmen can work easier and faster, But the tools are difficult to carry because of the large number, and the craftsmen usually as the medium. Rice sacks are easy and cheap to get, but the downside is in the way to carry it, it causes physical fatigue. A product has to be user friendly, the position of carrying the rice sack is not ergonomic and can influence the muscle performance the causes health effects and unbalance body posture.
