

PREFACE

This thesis has been carried out to fulfill the graduation requirements in the Graduate Program Graduation Master in Telecommunication Engineering ó Telkom University with the title Performance of Vehicular Adhoc Network by Content Prioritizing Scheme (EDCA) at Gauss-Markov mobility model.

Foremost, I would to thank to GOD for the HIS Blessing so I can give my best effort to this research and finish the thesis at the time it should be.

I would like to express my sincere gratitude and thanks to:

1. My advisors Dr. Rendi Munadi M.T and Dr. Doan Perdana S.T M.T for the continuous guidance of my study and research and immense knowledge.
3. Dr. Fiky Y Suratman as Head of Graduate Department for giving me support doing research.
4. Dicki Haris Sujadi and Haristianto, as Coordinator of Access Labs, for full support in developing the simulation program as well as capturing the result.
6. The whole team in Telkom University Graduate Program for the support and encouragement
7. My fellow of S2 PJJ Telkom for the simulating discussions and for all the experience we have had in the last two years.
8. PT Telekomunikasi Indonesia for the scholarship support
