

ABSTRACT

In the competition proceed to Junior High School is quite tight, it takes careful preparation. One of them is doing try out, so that participants who will take the national exam to get an idea how the national exam will take place. Currently Try Out is still running manually or not computerized which causes the students difficult to implement Try Out at any time. So with that required an application that can help the students. The features that exist in this application is doing try out, can know directly the results of try out, see the discussion try out and there is a recommendation of Junior High School in accordance with the Try Out results so that it can provide an overview to students to continue to Junior High School that has been Recommended and can continue the school after graduating from elementary school. Work method done to do this application is waterfall method. This application can be accessed online.
