Its glory, islam bring up the massive benefit inventions for the development of science and technology. Unfortunately, just a few of people who know about this fact as what Micha Hamilton said on New Foundation of Peace. So the discoveries from moslem scientist seems to be ignored and forgotten.

Based on an interview with Mrs. Imas as one of teachers in Az Zahkia Bandung Islamic Elementary School, many children did not know yet about these discovery. According to her, knowing the history about that discoveries is something important especially for student. Based on data from an interview, observation and investigation, there is method needed to re-introduce these discovery for children nowadays. The method is by making an illustration book with theme of "The Discoveries of Moslem Scientist". This method considered as the most effective because many children loved to read an illustration book.

Children are expected being attract with the discoveries by reading this book. Besides, we hope that children we hope that children are get easy to understand. And finally, they are motivated to develop their creativity.

Keywords: Book Illustrations, Discovery, Moslem scientists
