

ABSTRACT

Monitoring is a monitoring activity intended to provide information about the causes and effects of a policy being implemented. Monitoring is needed so that early mistakes can be quickly identified and corrective actions are taken, thereby reducing the greater risk. While SKU stands for General Skills Standards. While religion is an element that reflects the vertical relationship between man and God Almighty. When combined into a Religious SKU, then the definition is the standard of some activities that implement the vertical relationship between man and God Almighty. In the test of competence of religious instruction in SMA Darul Hikam Bandung, the process of monitoring activity is arranged in book of SKU Religion (journal of religious learning activity) containing minimum requirement that must be possessed by learners to pass the test. Component . Components of competence test included in SKU book or journal of religious instruction activity are test of written test, oral test test, uts and uas. A written test score sheet is a subject-based exam. In these subjects have sub chapters where each chapter has material to be tested. The Oral Test Assessment Test Sheet is read and revelation of the Qur'an starting from recitations (read surah), tikrar (memorized surah based on the verse tested), and muraja'ah (whole surah recitation). Followed by UTS (Mid Semester Exam) and UAS (Final Exam Semester) which will be a report of religious activity data.
