

ABSTRACT

Indonesia is very rich with local languages and regional literature. The wealth, on the one hand a pride, on the other hand a task that is not light, especially when thinking about how to protect, explore the benefits, and maintain its diversity. Based on the results of interviews with several language teachers there are several problems. These problems include Batak script is not a basic lesson due to lack of teachers and books that are not adequate. Another problem is the way of writing Batak script that is difficult to distinguish when someone wants to learn Batak script. In addition, the lack of media training for someone learning to read Batak script. Based on the problems found above feared the language of Batak area extinct. Plus most Batak people rarely use the Batak language in everyday life and Batak language books are also hard to find. To overcome these problems then created the Batak Script Learning App. This application is made to be an alternative media in learning the Batak language and learning reference for someone to learn Batak script that is expected to prevent the extinction of Batak language.

Keywords: *Script, Batak, learning.*
