ABSTRACT

Tryout an evaluation exercise of learners before the exams. College Exam practice questions can be done using a book - a book of reference, following a tutoring agency or the use of digital media. Due to the conditions now are all-digital and practical, it is necessary to study the method is more efficient and effective. Tryout college exams this as a measure of the ability of learners to meghadapi real college exams before entering higher education. Because each college has its own value standards for students to be accepted.

In this final project, I create android application test college entrance test and a reminder of a time when learning exercises. With the application, students can easily practice questions, access information about colleges as well as the desired user can also measure ability to learn by looking at the scores and the passing grade of Higher Education.

The results of this final project of making a trial application that can be used to help facilitate learners to practice questions - exam study schedule and reminders to help remind users to practice exam questions. At the end of the project's application focus is aimed at university entrance test and its supporting applications Remainder. This application has been tested for functionality functionality that all functions within the application runs well on smartphones with Android operating system version 4.0 (Ice Cream Sandwich). From the tests performed, the application made to say Well it is derived from a subjective test results and the calculation of MOS.
