

Abstract

Prayers by Personality 'is the sayings and deeds of specific, that began with takbiratul ihram and ends with greetings. prayers can be done individually or simultaneously which is usually called prayer worshipers. prayer congregation itself is done by two or more people, in the prayer congregation has rules which are setting rows pilgrims

In the modern era, many elementary school children that are difficult to learn by theory or read using the manuals. Especially for Muslims in prayer learn by just reading the manual is very difficult. Because now many elementary school children who use smartphones and there was not much else using the manuals to read.

Of these problems comes the idea to create a mobile application, in which there are ways of ways of arranging the rows of prayer in the form of 3D animation that appears when the marker is scanned. This application uses augmented reality technology to simplify the explanation of how the preparation of rows for prayers that is good and right according to Islam.
