

# ABSTRAK

---

A hotel is one of the largest hotels in Indonesia under the auspices of the big companies in Indonesia which is engaged in hospitality. A hotel is a 5-star hotel. The existence of car rental system for a hotel guest is best breakthrough. That's because going to improve the quality of service and efficient officers in monitoring the availability, ordering and payment of the rental car and driver. The application system will connect directly to the database server hotel guests. This application uses the Oracle database. This app was built through the Oracle Application Express (APEX).
