

## ***ABSTRACT***

---

*Many lessons are given from religious subjects in Cilengkrang public elementary school to build the characteristics of children. One of them is education about respect and obedience, and caring for others that education is very important to apply to children. But the limited teaching time is 3 hours a week, and how to receive different material from the students where the results of the questionnaire given to 15 students, there are three classifications obtained by reading, writing, listening and viewing pictures or examples. And it is still a constraint in the application of these characteristics. Therefore, the children moral learning application in primary schools to be built is expected to be more helpful in the process of moral application to children to better understand what the child will do and at least know what things to do in certain situations.*
