

ABSTRACT

Nowadays, the basic needs of the urban population have been increased from time to time and it results in the needs to also improve one's ability to perform well, moreover when it comes to the work experiences. In terms of the productivity, the effectivity, and the efficiency, the employee must achieve a good performance at their work place, specifically in the big city like Jakarta. However, with the advancement of technology nowadays, it has implicitly supported and assisted the employee to execute their job duties in regard to communication aspect, transportation aspect, and so forth, as of to ease them to get their work done. When the employee performs well, it then will result in the satisfactory development of its company. Therefore, the company needs to provide good facilities to support the employee's productivity and to maintain them to perform well. An office is one of the most significant facilities that both employee and employer need to consider this. This paper will take an example of B2TKE Badan Pengkajian dan Penerapan Teknologi (BPPT) Office as one of the companies that is locaters in Puspiptek, Jakarta. The scheming and design of B2TKE BPPT office. has a purpose to build the work environment, which is qualified to encourage the employee and improve their productivity throughout the representative of the room. This approach then, will be applied to each workspace and it is aimed to improve the employee's productivity and effectivity when doing their job
