

ABSTRACT

The Library of Higher Education is a library that is under supervision and managed by universities with the primary goal of helping colleges achieve their goals. The existence of Library of Higher Education is expected to provide services to the academic community as needed. Therefore, the condition of an advanced and modern library is an indicator of a college that is able to meet the needs of visitors through the facilities and conditions of a convenient library directly has helped the achievement of the college in achieving its vision and mission. Institut Seni Budaya Indonesia (ISBI) in Bandung is one of the universities that focuses on education especially in the field of Arts and Culture. However, these facilities generally have problems in the lack of function facilities and interior atmosphere is less processed and less attention to comfort for visitors. Therefore, it is necessary to redesign the ISBI library so that the library can adjust to the times and meet the needs of its users through facilities and a comfortable atmosphere but still in accordance with the vision and mission ISBI.
