

ABSTRACT

Education is the foundation of the future and the formation of intelligence is not only judged in general but also religion, especially the Islamic religion since the majority of Indonesian society is Muslim. Provision of educational facilities in the city of Purwokerto in terms of facilities can be said to be quite complete. Education facilities are not only provided by the government, the private sector also plays an active role in the provision of educational facilities. one of them is Al Irsyad Al Islamiyah Foundation which is an integrated Islamic school from kindergarten to high school level. However, several Islamic Schools Al-Irsyad Al Islamiyyah Purwokerto has two buildings located separately, one of them is SD IT Al Irsyad Al Islamiyyah 01. The existence of separate locations is very difficult in terms of coordination between locations and between each school. In addition, the attention of the principal becomes unfocused. The location of the average school located near the residential population and the narrow neighborhood roads cause congestion problems at the time of departure and school. Seeing this problem, in Purwokerto it is necessary to build an integrated Islamic School Al Irsyad in accordance with the educational facility needs plan. Therefore, to overcome these problems required planning and design of the Integrated Islamic School Al Irsyad in Purwokerto. The theme chosen in this design is school of creative, and the chosen concept is fun and focus by combining minimalist style.
