

ABSTRACT

In this age and future, Orthopedics will be one of the most desirable disciplines in Indonesia, especially in Semarang, given the increasing number of cases of bone injuries that occur. It can not be offset by the number of orthopedic special hospitals that only have three hospitals based on data from the health ministry. with orthopedic cases increasing, orthopedic patient needs to be facilitated since there is only one hospital in Indonesia that can facilitate the treatment of bone cases that causes the hospital flooded by patient .this can be done by presenting a Specialized Orthopedic Hospital that applies the appropriate concepts of orthopedic hospitals to fit the needs of physically and psychologically orthopedic patients. with the existence of this Orthopedic Special Hospital, it is expected that the welfare of patients, as well as other users involved in it can be realized so that the process of healing and treatment of orthopedic patients runs smoothly
