ABSTRACT

Nature school is an alternative school was conceived by Lendo Novo with the meaning that the children can learn while playing and interacting directly with nature. Concept of fun learning is the unique and enjoyable methods for children can applied to the Nature School, create a school building which is usually limited by a permanent wall insulation become one of unity with nature. Bring the unique things that nature has to offer into a building requires the structure of form and design that does not damage the nature. On this natural school learning space and space supporters of other facilities not yet processed in particular and according to the standard regulation. Indeed children spend time more outside space, but when the children are in the classroom is necessary to the interior styling that does not make children educational feel bored. Moreover if seen from the sense of security and comfort, as space-space used as a learning space, library, science laboratory and computer, layout, ergonomics standards and charging space space and material used. With the implementation of the tropic style that was interpreted as adapted from tropical climate environment, intended to design is created can make children grow up to be a good personal and creative. This theme does not remove from the implementation of the concept of tropical design that related with the characteristics of the climate change environment.

Key Words: Interior Design, Nature School, Tropical Design, Tropic Style.
