

ABSTRACT

Coffee pudak is one of the coffee shop in Bandung, West Java. Located in Puduk street 31 Bandung. In purpose to give solution to the owner of coffee Puduk to improve the performance, so Coffee Puduk creates a system. In the ordering process there is a problem on the managing the order by the paper method. Bad arranging and take too much time is the problem. therefore, Coffee pudak needs a web mobile ordering application that can solve the problem in their system.

In the development process this application has been using the technology framework Laravel to simplify the modules used to be integrated subsystem. Ease of module can be effective in making code where a file to be split into some data needed.
