

ABSTRACT

BMT Alfa Dinar is a company engaged in the field of syariah financial institutions that serve deposits, loans, and deposits based on sharia. BMT Alfa Dinar was established on June 1, 2003 by activist mosque and economic activist of Islam in Karanganyar Regency. In addition to serving deposits, loans, and mudaraba, BMT Alfa Dinar also serve ta'awun gathering and also serve gold sales. For ta'awun gathering is done by members BMT Alfa Dinar with a deposit of Rp. 100.000, - every month. After all members of the ta'awun gathering make a deposit will be done drawing arisan. Cash sales may be made by non-members or non-savings members in BMT Alfa Dinar, but for credit sales may only be made by members who have savings in BMT Alfa Dinar, because if on due date the installment payment arrives and the member has not made any installments then members may choose to pay in cash or deducted from members' savings to pay gold installments. In BMT Alfa Dinar all transactions have been done computerized, while for the sale of gold and ta'awun gathering done manually by storing the gold purchase note which will be used as the determination of the selling price, it will be problematic if the purchase note is lost because the employee will have difficulty in determine the selling price. Transaction ta'awun gathering done by members who have made the deposit will be recorded in the arisan book held by members of the arisan, it will also be problematic if the ta'awun gathering book lost because the employee will have trouble knowing whether the member has made the deposit or not. These problems can be overcome by the creation of applications that can handle the sale of gold and ta'awun. The application of gold sales and ta'awun gathering is made with the purpose of assisting employees in managing member data, handling sales transactions and ta'awun arisan, producing accounting reports and records. Tools used to create applications that is by using database MySQL, codeigniter, and php programming language. This application can facilitate pagawai in making sales transactions and social gathering ta'awun, facilitate employees in handling gold installment transactions for credit sales.
