

Abstract

This Virtual Reality traditional Stilts game is made to preserve and introduce the traditional game to this present times. Traditional games are now almost no longer found in several areas because over the times, smartphones are more attractive to young people than playing traditional games. In the era of the development of smartphones, virtual reality gaming technology attracted many users and it would be very interesting and useful if one of the traditional games played virtually. Therefore, we strive to create a traditional game of Stilts packed in an exciting and interactive Virtual Reality game. This game uses a controller to control stilts, and this game can change the background of the place and record the time taken in stilts racing.

Keywords: Virtual reality, Stilts, traditional game
