ABSTRACT

Lecturer's Performance Assesment is a important component to asses the quality of a lecturer in lectures. Information Management is one of the study program in Telkom University, the study program have a system to asses a lecturer's performance based on the teaching aspect. Organized by the Head of the study program, within help from their Lecturer's Coordinator, Final Task's Coordinator and Lecturer. Although, in the implementation itself, there has been a difficulites, such as to inform the indicator with the Key Performance Indicator (KPI) for the assessment and to process the data to become a score for the lecturer.Therefore required an application that can help the system to be better. "Web Based Application Of Management Performance Achievement Teacher At Informatics Management D3 Study Program For Teaching Field" is built using PHP as the programming language, with Codeigniter as the framework and MySQL as the database. Development method for the application is using Waterfall methodology. The Application is only used in D3 Informatics Management study program.Based on, testing's process, the application can help to manage lecturer's achievement scoring at Informatics Management Diploma Study Program Telkom University.
