

## ABSTRACT

---

*Application of Of Tuition Fee Management of Madrasah Tsanawiyah (MTS) Pesantren Persatuan Islam (PERSIS) 84 Ciganitri is an application used to assist the monitoring of the existing fees revenue management process in Madrasah Tsanawiyah 84 Ciganitri. The fees section is one of the most important parts of the organizational structure of an educational institution. The process contained therein must be managed in detail and clear. But sometimes there are some problems during the process of recording financial data. This application is built in a web version that has a feature user can get an account in accordance with their respective roles. This Web-based application was built using the Waterfall method, using the Hypertext Preprocessor (PHP) programming language and the CodeIgniter (CI) Framework. By constructing this application, it can help monitoring the chairman of the foundation, treasurer, daily treasurer on financial management and can help students in monitoring the payment of tuition fees.*
