

ABSTRACT

Procurement of goods / services is an activity to obtain goods / services. the processes starting from the planning needs to be completed all activities to obtain goods / services. Customer who ordered the goods at PT Bhakti Unggul Teknovasi still register by phone or come directly to the place, this can cause errors of registration. The request of the first diapprove by the director by looking at hardcopy a letter of the bid price (SPPH) and a mail delivery of logistics to customer or otherwise through social media WhatshAp or I or delivery service so that the letters which have been sent from logistics and the letter was sent from the customer not integrated well. The solution is provided to make web based applications that can help the company PT Bhakti Unggul Teknovasi in managing procurement of goods to terintergerasi well. In making this application will be divided into two modules of the procurement of goods to customers and the procurement of goods with vendors who use Framework Codeigniter. In the project the end of this will focus more on the procurement of goods with the customers.
