

## ***ABSTRACT***

---

*The Financial and Asset Management Agency (BPKA) has a warehouse section assigned within of budget funds data, data management of goods, data recording, no reports of goods data entry, outgoing goods data report and year-end report data. From the above problems, it is proposed an application called "Application of goods and asset management in BPKA office using the method of Just In Time". The purpose of this application can be to shorten the staff performance time in the warehouse to be able to directly monitor the demand for goods, assist in recording incoming and outgoing goods or year-end reports and create an integrated system. This application is web based using the Prototype method and used using XAMPP, Sublime Text, Chrome, Snipping Tool, and PHP My Admin.*

*Keywords: Application, BPKA, Goods Data, Report and Management.*
