

ABSTRACT

Madrasah Ibtidaiyah (MI) Sukapura is one of the madrasah owned by the foundation At-Tarbiyah Islamiyah is a non-profit institution. The treasurer at this madrasah records income, preparation of budget plans, and management of budget realization not yet in accordance with accounting standards, because the recording does not record general transaction transactions, ledgers, and budget realization reports. All transactions recorded still using Microsoft Excel does not close the possibility of errors in the conduct of transaction management and incompatibility of transaction data that has been done so that the recording of accounting reporting becomes more complicated. Along with the development of technology made an application that can manage revenue recording, budgeting and realization, and recording the appropriate accounting reports. With this application madrasah can minimize time and effort. Management of budget realization using cash basis method. Writing the program code in this application using Codeigniter (CI) and using MySQL. Application testing using Black Box Testing method has functionality can manage account data, income data, expenditure data, manage madrasah income records, preparation of budget plans, manage budget realizations, and manage accounting records such as general journals, ledger, budget reports, and budget realization reports.

Keywords: Revenue Recording, Preparation of the Budget Plan, Budget Budget Formulation (RAB), Manage Budget Realizations, Managing Budget Realization, Codeigniter, MySQL, Web Based Application.
