

## LIST OF FIGURES

|                                                                                        |    |
|----------------------------------------------------------------------------------------|----|
| Figure 2.1 Architecture WSN .....                                                      | 7  |
| Figure 2.2. Protokol stack WSN .....                                                   | 7  |
| Figure 2.3. WSN component block.....                                                   | 7  |
| Figure 2.4. Comparison of wireless communication standards .....                       | 8  |
| Figure 2.5. ZigBee Architecture .....                                                  | 9  |
| Figure 2.6. Network Structure IEEE 802.15.4 / ZigBee .....                             | 10 |
| Figure 2.7. Rice growth phase .....                                                    | 13 |
| Figure 2.8. Development of rice plant growth .....                                     | 13 |
| Figure 3.1. WSN System Model .....                                                     | 13 |
| Figure 3.2. Flow chart system.....                                                     | 15 |
| Figure 3.3. Location of vegetative stage .....                                         | 16 |
| Figure 3.4. Location of reproductive stage .....                                       | 16 |
| Figure 3.5. Location of ripening stage .....                                           | 16 |
| Figure 3.6. Plotting topology cluster tree.....                                        | 18 |
| Figure 3.7. Schematic node coordinator with node sensor/node router.....               | 20 |
| Figure 3.8. Schematic node coordinator with router node and end device .....           | 20 |
| Figure 3.9. Cluster tree topology scheme with 7 sensor nodes.....                      | 21 |
| Figure 3.10 Routing mesh topology.....                                                 | 22 |
| Figure 3.11 Routing cluster tree topology .....                                        | 23 |
| Figure 4.1. Location of research area.....                                             | 25 |
| Figure 4.2. Sensor node .....                                                          | 26 |
| Figure 4.3. Node coordinator .....                                                     | 26 |
| Figure 4.4. Results of RSSI measurements on <i>XCTU software</i> .....                 | 27 |
| Figure 4.5. RSSI curve for distance at the vegetative stage, reproductive, ripening. . | 28 |
| Figure 4.6. Delay graph with an area of 1 hectare and 2 hectares .....                 | 30 |
| Figure 4.7. Testing results of four sensor nodes in <i>XCTU software</i> .....         | 31 |
| Figure 4.8. Graph of pH levels at stage of rice growth.....                            | 32 |
| Figure 4.9. Graph of temperature at vegetative stage in node device 4.....             | 34 |
| Figure 4.10. Graph of temperature at vegetative stage in node device 7.....            | 34 |
| Figure 4.11. Graph of temperature at reproductive stage in node device 4.....          | 36 |
| Figure 4.12. Graph of temperature at reproductive stage in node device 7.....          | 36 |
| Figure 4.13. Graph of temperature at ripening stage in node device 4.....              | 37 |
| Figure 4.14. Graph of temperature at ripening stage in node device 7.....              | 38 |
| Figure 4.15. Graph of vegetative soil moisture test results.....                       | 40 |
| Figure 4.16. Graph of humidity soil test results of reproductive stage.....            | 41 |

Figure 4.17. Graph of soil moisture moisture test results .....43
