ICT – Universal Service Obligation Agency (BP3TI) is association form under Ministry of Communication and Informatics (KOMINFO) Indonesian Republic. Based on the decision of finance minister number 428/KMK.05/2011 BP3TI has tasked a duty in providing and managing the financing in performing the duties of Government of Indonesian Republic which focus on telecommunication and informatic. BP3TI tasked in providing and managing financing in telecommunication and informatic still can't perfectly. This is show by an inconsistency between information technology and business process in Function of Infrastructure Provision. To create consistency between information technology and business process, it required enterprise architecture.

This research titled “Analysis and Design Enterprise Architecture ICT – Universal Service Obligation Agency (BP3TI) On Function of Infrastructure Provision Using TOGAF ADM”.
