

ABSTRACT

The city of Bandung is located at position 107o East Longitude and 6o55 'South Latitude and has an area of 16,729.65 Ha. In addition to the large area, the temperature in the city of Bandung 23.5 ° C very cool temperature. The city of Bandung is still strong with Sundanese culture with a philosophy of "Soméah Hade ka Sémah" which means friendly, good attitude, guarding, entertaining and happening every guest or everyone. In addition Bandung also has the nickname of the city of paris van java is in because long ago Bandung has a clothing store similar to that in paris. The city has an area of 167.7 km ² of large area, in addition to large area. The city of Bandung has many tours of nature and culinary tourism, as well as quite a lot of public space such as the city square of bandung, asia afrika road, braga road, surdiman street, lembang. The public space also has many facilities such as seating, prepaid parking, gyms, and old buildings that are maintained by the government. Gadget is a tool that must be brought to make it easy to communicate and have another function that is a tool to capture the moment. But not a few mobile phones today have a fast battery power to run out or lowbat. To solve the problem, the design uses environmental aspects to design the product by redirecting the environment and the culture of the counterpart, especially in the city of Bandunng. The design of a facility to recharge the battery (charger station).

Keywords : *Lowbat, tours, Bandung, Culture, Handphone, public room, charger stat*
