

ABSTRACT

Cinta Quran Center; Tahfizh & Da'i Institute is a center for fostering Da'i candidates and memorizers of Al-Qur'an, with pesantren system. The Cinta Qur'an Center is a non-formal educational institution with a duration of 1.5 years. This program is initiated Because Indonesia needs thousands of Da'i who deliver the Qur'an to various quarters of the archipelago. Later on, the students recruited from all regions of the archipelago will be given facilities in the form of free tuition, House dormitory, Fulfilling the needs of food, pocket money, and other learning support facilities.

According to a survey conducted to some Tahfidz Qur'an pesantren, the presence of tahfidz pesantren in Indonesia tends to pay less attention to the aesthetics and convenience aspects of the user. Pesantrens in Indonesia still seem traditional and monotonous, whereas, the majority of users from pesantren are adolescents. Monotonous designs can cause visual discomfort and boredom to users who in this case are teenagers. In addition, pesantren also still lack the identity of Islam in interior design, and still not meet the comfort of the space, good visual comfort, comfort and acoustic thermal comfort. Facilities available also have not fulfilled all series of activities tahfidzh with the maximum. In fact, comfort and a special place to memorize the Qur'an is something that is important to note because it is one factor that affects the speed of memorizing the Qur'an and remember the user of this boarding will move in space in a long time.

Therefore, it is expected to design the Interior of Cinta Quran Center; Tahfizh & Da'i Institute can be a facility that accommodates all the activities of Tahfidz and Islamic Da'wah as well as providing comfort especially in terms of interior design to support education for candidates of Qur'an preacher da'i tough and ready to preach Al-Quran to be a solution and Inspiration for the country.
